Art Unit: 3751

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-3, 9, 11-19, 25, 29-34 and 40-46 are rejected under 35 U.S.C. 102(b) as being anticipated by Finan et al. (4,689,937). Finan discloses an ice bagging apparatus including a means for producing ice 10, a hopper 12, a means for bagging the ice 18, a means for dispensing the bagged ice 40, an agitator 14, 16, a sealer 76, a control 20-22, 38, and a sensor 65 that measures generic bag parameters and also senses whether or not the correct bag is installed by sensing whether or not the bag includes markings or dots that can be read by an optical sensor as called for in claims 33 and 46. Finan also discloses operational sensors such as 32 and 74.

3. Claims 1-46 are rejected under 35 U.S.C. 102(e) as being anticipated by James. Applicants disclosure and claims are identical to the James reference. This rejection cannot be overcome by an affidavit or declaration under 37 CFR 1.131. Since this application is identical to the James reference, there is nothing that can be claimed in this application which is not disclosed or anticipated by the James reference. In order to obtain a patent, Applicant must provoke an interference by filing a showing under 37 CFR 1.608(a) and (b) as explained in MPEP 2308.01 and 2308.02. If Applicant does

Art Unit: 3751

not file the proper papers or showing in accordance to 37 CFR 1.608(a) and (b), then this application will be denied a patent. If Applicant does not have or cannot acquire copies of 37 CFR 1.608(a) and (b) and/or MPEP 2308.01 and 2308.02, then Applicant should telephone the examiner and request copies.

4. An examination of this application reveals that applicant is unfamiliar with patent prosecution procedure. While an inventor may prosecute the application, lack of skill in this field usually acts as a liability in affording the maximum protection for the invention disclosed. Applicant is advised to secure the services of a registered patent attorney or agent to prosecute the application, since the value of a patent is largely dependent upon skilled preparation and prosecution. The Office cannot aid in selecting an attorney or agent.

Applicant is advised of the availability of the publication "Attorneys and Agents Registered to Practice Before the U.S. Patent and Trademark Office." This publication is for sale by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.
